SABBIR AHMAD

FULL-STACK AI-Native SOFTWARE ENGINEER

sabbirahmad653@gmail.com +8801304867542 GitHub LinkedIn bysabbir.com

Full-Stack Software Engineer with 2+ years of professional experience building production SaaS applications for international clients using React, Next.js, TypeScript, Python, FastAPI, and Node.js. Experienced in delivering products end-to-end from system design and database architecture to API development, deployment, and production support. Strong background in REST APIs, SQL, Redis, real-time systems, CI/CD, and AI-powered applications.

SKILLS & TECHNOLOGIES

Frontend: React.js, Next.js (App Router, SSR, SSG), TypeScript, Tailwind CSS, Redux Toolkit, Zustand

Backend: FastAPI (Python), Django, Node.js, Express.js, Laravel, REST APIs, WebSockets

Database: PostgreSQL, MySQL, MongoDB, Redis, Prisma ORM, SQLAlchemy, Supabase

AI & LLMs: RAG, ChromaDB, OpenAI API, Claude API, Gemini API, Grok API, LLM Integration

DevOps: Git, GitHub Actions (CI/CD), Docker, Nginx, AWS (EC2/S3), VPS, Render, Vercel

Other: JWT/OAuth 2.0, Semantic Search, Web Scraping, Agile/Scrum

PROFESSIONAL EXPERIENCE

Full-Stack Developer - Qullia Software Agency Mar 2024 – Aug 2026

- Delivered 20+ production web applications and SaaS platforms for international clients.
- Designed scalable architectures using Next.js, FastAPI, Node.js, Laravel, PostgreSQL, and Redis.
- Built REST APIs and optimized database schemas, reducing data fetch latency by 35%.
- Implemented Redis caching and performance optimizations for low-latency APIs.
- Implemented secure authentication, payment systems, and automated CI/CD pipelines.
- Owned features end-to-end from system design to production deployment.

PROJECTS

TechNest Pharma ERP – Pharmaceutical Sourcing & Management ERP. Live | Github | Case Study

Next.js 16, TypeScript, FastAPI, PostgreSQL 16, OCR, AI/LLM, Gmail REST API, Pub/Sub

- Architected and developed a full-stack B2B pharmaceutical sourcing ERP using Next.js 16, TypeScript, FastAPI, and PostgreSQL 16 across 63 mapped database tables.
- Engineered an automated tender scraping and document ingestion pipeline utilising pdfplumber, pypdfium2, and Tesseract OCR.
- Integrated Google Gemini and NVIDIA LLMs to parse complex government tenders and unstructured supplier quotation emails with a human-in-the-loop review guard.
- Built an automated product enrichment engine connecting PubChem, FDA GSRS, and ChemicalBook APIs to resolve unmatched substances
- Implemented a compliance-grade financial ledger featuring precise Decimal arithmetic, automated daily exchange-rate synchronization
- Integrated the Google Gmail REST API via OAuth and Pub/Sub webhooks with resilient background worker loops for threaded supplier communication tracking and automated archiving.

Runner City Housing Management System (RCHMS). Live | Github | Case Study

React.js, Node.js, Express.js, MySQL, Docker, Tailwind CSS, Railway

- Built a multi-tenant housing management SaaS for 100+ households.
- Developed resident management, payroll, fee collection, and financial modules.
- Implemented role-based authentication and SSLCommerz payment integration.
- Configured Docker-based CI/CD pipeline for automated deployment.

ShaadiMartBD – Matrimony Platform. Live | Github | Case Study

Laravel, Next.js, TypeScript, MySQL, Laravel Reverb, Nginx, GitHub Actions

- Built a production-ready matrimony platform with tiered subscriptions.
- Developed secure authentication and an 8-step profile completion workflow.
- Implemented real-time chat using Laravel Reverb and WebSockets.
- Optimized MySQL queries for advanced search and filtering.
- Automated VPS deployment using GitHub Actions and Nginx.

EDUCATION

Bachelor of Science in Computer Science June 2022 – sept 2026

BRAC University, Dhaka, Bangladesh.

Thesis: Explainable Video Anomaly Detection (XVAD) on UCF-Crime using TimeSformer + MIL + Vision Language Models, with a RAG pipeline for contextual video segment retrieval.
